

XTech Gear, Inc. is able to provide testing and repair services for all Lucent FT-2000 Equipment.

The Lucent FT-2000 is an OC-48 Lightwave Optical Transport Ring, with capabilities including optical OC-3, OC-12, IS-3 as well as many types of DS-3 interfaces. It is designed with high availability, redundancy and dependability into a system with a low footprint and flexibility.

All equipment that enters our facility for testing or repair is entered into our equipment tracking system, and the board's status is updated as our technicians go through testing procedures on the circuit pack. You are able to check the status of your equipment at any time via our web based Repair Portal, or by contacting one of our repair representatives.
